

Project/Thesis Predefense comments made by expert member

- Comments on Projects

The following things must include in the final project document:

1. A proper project flow diagram which describes outline of the project workflow
2. Well-designed E-R Diagram (if any database is used in project)
3. Schema Diagram (if any database is used in project)
4. Detailed Use case diagram
5. Class diagram.

Note: Every project should follow software engineering procedures properly.

- Comments on Thesis

1. Objective of the thesis should be very specific.
2. Only relevant literature reviews should be mentioned.
3. Clearly specify the main contribution of work.

Each project/thesis group should discuss with their respective supervisors about the issues mentioned above and try to fix up these within 7th August, 2019.

Thanking you

Prof. Dr. Mohammed Nasir Uddin
(Chairman, Examination Committee)
4th Year 2nd Semester
